

Call for Papers:

From AI to Applications

This is an invited session for KES2008, the 12th International Conference on Knowledge-Based and Intelligent Information and Engineering Systems. The conference will be held on 3, 4 and 5 September 2008, Zagreb, Croatia. The subject of this session is the transition of ideas from the AI and knowledge based systems into industrial or business applications. AI has been a strong contributor to mainstream computer science with examples like compiler theory and searching algorithms. Currently, AI techniques are contributing to the implementation of software for the enterprise. The focus of papers in this session will be to illustrate the use of AI techniques and ideas to build real world enterprise or business solutions.

Papers will be due March 30, notification of acceptance by April 10, and final versions finished by April 30. Papers will be submitted to the Prose site. Details on the format for the papers can be found at <http://kes2008.kesinternational.org/>.

With the tight deadlines, please email Hartung@franklin.edu with your intention to submit a paper.
